Indian Journal of Academic Medicine and Diagnostics (IJAMD)

ABOUT THE JOURNAL

Indian Journal of Academic Medicine and Diagnostics (IJAMD) is an international, peer-reviewed, open-access journal dedicated to advancing excellence in all branches of medical and allied health sciences, including General Medicine, Surgery, Pediatrics, Obstetrics &Gynecology, Orthopedics, Ophthalmology, Otorhinolaryngiology, Dermatology, Psychiatry, Radiology, Pathology, Microbiology, Pharmacology, Community Medicine, Biochemistry, Physiology, Medical Education, Dentistry, Nursing, and Allied Health Sciences. As a next-generation publishing platform, the journal serves as a dynamic forum for researchers, clinicians, surgeons, academicians, and healthcare professionals to share innovative discoveries, clinical experiences, and evidence-based practices that improve vision health worldwide.

In an era where scientific progress is often hindered by high article processing charges (APCs), limited accessibility, and prolonged publication timelines, **IJAMD** is committed to breaking these barriers. Our mission is to provide an affordable, transparent, and efficient publishing platform that enables researchers especially from developing and resource-limited regions to disseminate their work without unnecessary delays or financial burdens.

AIM AND SCOPE

Indian Journal of Academic Medicine and Diagnostics (IJAMD) is a multidisciplinary journal advancing medical knowledge, diagnostics, and evidence-based healthcare. It offers a platform for clinicians, researchers, and healthcare professionals to share original research, reviews, case reports, diagnostic innovations, and developments across medicine and allied health sciences. Covering clinical medicine, surgery, diagnostics, pathology, radiology, medical education, public health, and allied fields, IJAMD focuses on innovative diagnostics, clinical advances, healthcare technology, and emerging medical trends. Committed to scientific rigor and ethical research, it aims to bridge research and practice to improve healthcare outcomes in India and globally.

The mission of the **Indian Journal of Academic Medicine and Diagnostics (IJAMD)** is to promote high-quality, ethical, and innovative research in medicine and diagnostic sciences, facilitate the exchange of reliable scientific knowledge, and support evidence-based clinical practice to improve healthcare outcomes in India and worldwide. The journal particularly welcomes emerging research in artificial intelligence, digital health, advanced diagnostic technologies, precision medicine, innovative clinical approaches, and novel therapeutic strategies that are shaping the future of medicine and healthcare.

AUTHOR INSTRUCTIONS

Authors are advised to carefully review the detailed author guidelines before preparing and submitting their manuscripts to the Indian Journal of Academic Medicine and Diagnostics (IJAMD). These guidelines provide important information regarding manuscript preparation, formatting requirements, submission procedures, ethical standards, and the peer-review process.

To ensure a smooth submission and review process, authors must follow all instructions outlined in the journal's Author Guidelines. Manuscripts that do not comply with the prescribed format or requirements may be returned to the authors for correction prior to editorial review.

Plagiarism: The author must ensure that their work is original and properly provide the credit of the contributions of others. Plagiarism, including self-plagiarism, is unacceptable and undermines the integrity of scholarly communication

AI Guidelines: AI guidelines are designed to guide authors in addressing ethical and technical aspects of AI usage.

CONFLICT OF INTEREST

The corresponding author, on behalf of all co-authors, is required to disclose any financial or personal relationships with individuals or organizations that could potentially influence the research. Such relationships may include, but are not limited to, employment, consultancy, stock ownership, honoraria, paid expert testimony, patent applications or registrations, grants, or other sources of funding. All authors, including those with no competing interests, must provide the relevant information to the corresponding author, clearly stating if there is nothing to declare. The corresponding author should compile this information into a single shared disclosure statement using the designated tool and upload it during the Attach Files step of the submission process. The original . docx template must be used without conversion, and author signatures are not required.

EDITORIAL PROCESS

The Journals follow a rigorous and transparent double-blind peer-review process to ensure that all published manuscripts are scientifically sound, original, clinically relevant, and methodologically robust.

All submitted manuscripts undergo an initial editorial screening to assess suitability, scope alignment, and compliance with the Author Guidelines. Manuscripts that do not meet the required standards or exceed prescribed limits may be returned to the authors without peer review. Authors may resubmit after addressing the specified requirements.

Eligible manuscripts are forwarded for double-blind peer review, in which both authors and reviewers remain anonymous to ensure impartial evaluation. Each manuscript is reviewed by at least two independent external experts. In cases of conflicting recommendations, a third reviewer may be invited to provide an additional opinion. Editorial decisions are based on reviewers' evaluations and the Editor's independent judgment. The Editor's decision is final.

Reviewer comments and recommendations (acceptance, revision, or rejection) are communicated to the corresponding author. Authors are required to submit a revised manuscript along with a detailed, point-by-point response addressing each reviewer's comment. The review process may involve multiple rounds of revision until the manuscript meets the scientific and editorial standards of the journal.

Once accepted, manuscripts undergo professional copy-editing for language, formatting, grammar, and style consistency. Galley proofs are sent to the corresponding author for final review and approval. Corrected proof must be returned within three days to avoid delays in publication.

PEER REVIEW

IJAMD Journal follows a rigorous double-anonymized peer-review process to ensure fairness, transparency, and academic excellence. Upon submission, each manuscript is first evaluated by the editorial team to assess its relevance, originality, and suitability for the journal's scope and standards. Submissions that meet these criteria are then forwarded to a minimum of two independent expert reviewers for a thorough and unbiased assessment of the scientific quality, methodological rigor, clarity, and contribution to the field. Reviewer identities remain confidential throughout the process. Based on the reviewers' recommendations and the journal's editorial policies, the editors make the final decision regarding acceptance, revision, or rejection of the manuscript.

OPEN ACCESS POLICY

All articles published under the open-access model are made immediately and permanently available, allowing anyone to read, download, copy, and distribute the content without restriction. To support responsible and transparent reuse, authors are offered a choice of user licenses that clearly define how published articles may be reused. These licensing options ensure both wide dissemination of research and appropriate acknowledgment of authors' work. The following license(s) are currently available for this journal:

- CC BY (Attribution): Permits sharing, adaptation, translation, text and data mining, and commercial use, provided proper credit is given, the license is linked, and any changes are indicated.
- CC BY-NC (Attribution–Non-Commercial): Allows sharing and adaptation for non-commercial purposes only, with appropriate credit, license link, and disclosure of changes.
- CC BY-NC-ND (Attribution–Noncommercial–No Derivatives): Allows copying and distribution for non-commercial use only, with proper attribution and license link; no modifications are permitted.

PRIVACY STATEMENT

The names, affiliations, and email addresses provided on this Journal platform will be used solely for editorial and publication-related purposes. Such information will be handled with strict confidentiality and will not be shared, sold, or disclosed to any third party for commercial or unrelated purposes.

All personal data will be processed in accordance with applicable data protection and privacy regulations, ensuring the security and integrity of the information submitted to the journal.

SUBSCRIPTIONS/PERMISSIONS AND REPRINTS/ADVERTISEMENTS
